Name: Trs Copy Stream: S.1

MID-TERM I EXAMINATION -2022

S.1 CHEMISTRY

TIME: $1\frac{1}{2}$ HOURS

INSTRUCTIONS

Answer all questions

Kityo. R

1. (a) Often chemistry is called a laboratory subject. Briefly explain why.

Its subject materials and theories are based on experimental observation

(b) What subjects are related to chemistry?

Biology Agriculture
Physics
Mathematics

(c) All branches of science deal with the study of matter. State what chemistry studies about matter.

Chemistry studies chemical composition of matter and the changes matter undergoes under different conditions.

(d) State any four applications of chemistry knowledge in the society.

Rusting of Iron
Burning of fuel
Decomposition
Cooking
Washing with detergents

Scanned with CamScanner

2. The table below shows some of the changes that take place during different chemical processes named H, G, Q. R,M and K

Chemical processes	Changes during chemical processes
H	Steel reacts with oxygen and moisture to form a brown coating on steel.
G	Organic materials with the help of bacteria break down into new substances
R	Enzymes and acids break down large food molecules into small one absorbed into the blood stream.
M	Fuels and other substances react with air in the presence of heat to form new substances

(a) Identify the chemical process. (4 marks)

H ....Rusting....

G ....decomposition....

R ....Digestion....

M ....combustion....

(b) How is chemical process H a disadvantage to man? (3 marks)

....Tools wear out....

(c) What should man do to prevent chemical process H? (4 marks)

- Painting

- Keeping tools in a dry place.

Scanned with CamScanner

(d) State one advantage of processes G and M to man. (2 marks)

G: Formation of soil ✓

recycling of nutrients.

M: Source of energy. ✓

3. (a) In what ways has chemistry contributed to the economy of the country? (4 marks)

- Processing of agricultural products ✓
- Manufacturing of agricultural inputs ie fertilizers. ✓
- Manufacturing companies ie BIDCO, Nile breweries generate revenue ✓
- People get into different careers through acquiring jobs ✓

(b) Name any four mega factories and two products produced by them using the knowledge of chemistry that have improved on the economy of the country.

(6 marks)

Name of mega factory	Any two products produced by the factory
Cocacola ✓	cocacola, fanta ✓
Mukwano group ✓	cooking oil, soap ✓

Scanned with CamScanner

BIDCO ✓	Cooking oil, soap ✓
Nile breweries ✓	Nile special beer ✓

Any 6

4. (a) In the chemistry laboratory there are safety laboratory rules and regulations. Give three reasons why they are put in place. (3 marks)

- To ensure safe handling of apparatus ✓
- To minimise the occurrance of accidents ✓
- To ensure proper handling of chemicals ✓

(b) State the reason why a student should NOT: (2 marks)

(i) run while in the laboratory?

To prevent breakage of glass and pouring of chemicals on the body in case of accident ✓

(ii) taste or eat something in the laboratory?

Every thing in the laboratory is poisonous or may be contaminated ✓

(c) Name any four laboratory apparatuses which can be used to volume of liquids. (2 marks)

- Pipette ✓ - volumetric flask ✓
- Burette ✓ - beaker ; measuring cylinder ✓

5. (a) State six (6) materials used in everyday life that are made with the knowledge of chemistry. (3 marks)

- Liquid soap ✓ - Fertilizers ✓
- Tooth paste ✓ - Shoe polish ✓
- Soda ✓ - Plastics ✓

Scanned with CamScanner

(b) State six careers that require the study and knowledge of chemistry. (6 marks)

- Food processing ✓
- chemistry teaching ✓
- Pharmacy ✓
- chemical engineering ✓
- Medicine ✓
- Fertilizer processing ✓
- Chemistry research ✓

Any 6

END
