S.2 CHEMISTRY FIRST ACTIVITY OF INTEGRATION

As a young Chemistry student, organise a half-day workshop for people in your community to sensitise them on the application of Chemistry in everyday life and its economic contribution to the country.

Fig. 1.2: Materials used on a house

Fig. 1.3: Common things we eat and drink

Task:

1 Develop short messages which you will deliver to the people in this community about application of Chemistry in everyday life.

2 Develop some messages to illustrate the contribution of Chemistry to the economy of the society.

3 How would you ensure that members of the community appreciate the use of Chemistry in everyday life?

Hint: Use resources in **Fig. 1.2** and **1.3** to develop your message.
